

Paint.net 4.0.9 -**Project 1**- Edit/Recolor CSLP Art

Objectives:

Practice importing an image.

Practice editing clip art.

Practice removing white background.

Step 1:

Start a new Paint.net file. (File->New->Set resolution and print size)

Step 2:

Choose black and white CSLP Art from “Additional Clip Art” or “Manual Clip Art” on 2016 jump drive. Select a JPG.

Step 3:

Import clip art into Paint.net. (Layers->Import from file...->choose file)

Step 4:

Use magic wand tool to select area to color. Use color wheel, color swatches, or color picker tool to select color. Use paint bucket tool to fill selected area with color. Continue until image is fully colored.

Step 5:

Use magic wand tool to select the white background. Go to (Edit->Erase Selection) or press delete to remove the white background.

Step 6:

To keep the background transparent when importing file into a word processing or publishing document (File->Save As->PNG)

Extra Practice:

Repeat Steps above using CSLP Color Clip Art (Early Lit->On Your Mark Manual Clipart->JPEG->medal)

Change the blue to another color. Add text “Super Reader!”
