7 A badge has been successfully created

Make badge method:

1. Use the circle cutter to cut a circular pattern
2. Put the badge outer into the base mold
3. Put the circular pattern on the badge outer
4. Put the film on the circular pattern
5. Put the badge inner into the base mold
(The grooved side is on top)
6. Press the badge outer, then move the base mold, and press again to combine with the badge inner.
(After pressing the badge outer, there is no need to manually remove the badge)
7. A badge has been successfully created

Press Twice to Complete the Badge Making
